Work Offered

Project focuses on Fiber Reinforced Concrete using cold drink tin waste. The problem of waste accumulation exists worldwide, especially in the densely populated areas. Most of the non-degradable waste materials are left as stockpiles, used as landfill material are illegally dumped in selected areas. Large quantities of this waste cannot be eliminated. However, the environmental impact can be reduced by making more sustainable use of this waste. These research efforts try to match society's need for safe and economic disposal of waste materials.
