Grupo Sese is one of the leading European providers of sustainable supply chain solutions based on a solid business model. Grupo Sese covers all modes and services within the modern supply chain supported by their own technology and multinational teams. It has Pan-European coverage of all modes through an optimal mix of own assets, long term sub-contractors and partnerships. Besides offering industrial services, Grupo Sese designs product manufacturing processes and production engineering challenges. They offer customized logistics solutions, from inventory and facility management to sequential operations and with full JIT system. They are part of the supply chain, from consulting and solutions design to LLP and 4PL management experience. The student will be enrolled in the systems department and his work will be specified depending on the student's skills and knowledge. The trainee will work on software development and support the department.
